List of laboratory work

1. Introduction
2. Standing waves
3. termoelectric effect
4. energy gap in semiconductors
5. Plank's constant
6. Hall effect
7. Atomic spectra

How to plot a graph?

ex.

t(°C)	19	20	25	32	35	40	45	50
E[mV]	0.1	0.5	0.6	2	2.1	2.2	2.4	2.6

$E = f(t)$

$\uparrow \quad \downarrow$

$y \quad f(x)$

$y = mx + n$

$tg\beta = \frac{y_B - y_A}{x_B - x_A} = m$
